

Amendments to the Specification:

The following abstract of the invention is unchanged from the original submission, and has only been included herein to place it on a separate page in accordance with USPTO requirements.

ABSTRACT OF THE INVENTION

“This invention relates to a system and a method for distributing an invitation to one or more communication terminals connected in a wireless communications network. The system and method enables a user of a communication terminal to invite other users of communication terminals to a shared media experience, such as watching a television transmission at the same time, while the users may be at different locations.”
